Art Unit: 3611

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the light source disposed substantially on an outside surface of the support (claim 7) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

Application/Control Number: 10/618,518 Page 3

Art Unit: 3611

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United . States.
- 3. Claims 1-3, 5, 6, 9, 11, 13-15 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Howard, US #1,256,232.
- 4. Howard discloses a lighted pole and banner assembly including support 1a, light source (including at least one lighting element, an incandescent bulb, that inherently is one color) 8 disposed within the pole, and banner 2 (Figure 1). The support includes at least one translucent section 9 and other sections that are not translucent. The light source extends the length of section 1a. Power is provided from the automobile on which the display is mounted, the car battery providing a rechargeable source.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 4, 7, 8, 10, 12, 16-18 and 20-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Howard.
- 7. Howard does not teach different colors, however, the particular color of the lights is considered to be entirely a matter of design choice. Matters relating to ornamentation

Application/Control Number: 10/618,518 Page 4

Art Unit: 3611

only, and having no mechanical function, cannot be relied on where claims are not directed to design but are structural claims. In re Seid, 73 USPA 431 (CCPA 1947). It would have been obvious to a person having ordinary skill in the art to utilize any known color for the lights so as to provide the desired type of display.

- 8. Howard does not teach placing the light source on the outside of the support, however, this is considered to be an equivalent alternative. Placing lights along the outside of a post is old and well known. The examiner takes official notice of holiday light strings placed around lamp posts and other posts. Commonly, these strings of lights change color and turn on and off by means of a timer. It would have been obvious to one of ordinary skill to place light sources around the post so as to put decorations on posts that are not hollow or translucent.
- 9. Howard does not teach varying brightness, however, this is common. Dimmer switches are well known in the art of illumination. It would have been obvious to utilize a dimmer function for the light sources so that the appropriate amount of illumination may be employed.
- 10. Finally, Howard does not teach a solar cell, however, these are well known in the art. It would have been obvious to utilize a solar cell so that the display would be provided with power at all times, even if there is no source of electricity nearby.
- 11. Howard does not teach the specific method step of the instant claims, however, these methods would have been obvious to one of ordinary skill given the structure of Howard.

Conclusion

Art Unit: 3611

12. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. US patent 6192824 is cited as of interest.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Joanne Silbermann whose telephone number is 703-

308-2091. The examiner can normally be reached on Tues. - Thurs. 5:30 - 2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Lesley Morris can be reached on 703-308-0629. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
